BuildBlock Introduces New 4-inch Product Line and Double Taper Top Blocks

(Oklahoma City, OK, February 20, 2007) – BuildBlock Building Systems, LLC, is pleased to announce the impending launch of its new **4-inch product line** which will consist of straight, 90-degree and 45-degree Insulating Concrete Forms (ICFs). “In order to meet the needs of our Distributors and Dealers nationwide, BuildBlock will continue to broaden its product line with important new products every few months until we exceed all expectations and needs of our clients. Our new 4-inch line will be built with one of the strongest webs and form designs on the market today,” said Mike Garrett, BuildBlock CEO. “Our longer corners in both 90’s and 45’s make stacking and pouring the BuildBlock forms a breeze.”

The 4-inch line will initially be manufactured and available through BuildBlock’s Springfield, Missouri, facility with other locations forthcoming.

Also this spring, BuildBlock is expanding their 6-inch and 8-inch Product Lines with the addition of two new straight **double taper top forms**.

“Our clients have been asking for a Taper Top form since our inception and with the new form we will be able to more effectively compete in the commercial and large project markets. The new taper top forms are built with a thicker outside foam edge that keeps the foam from breaking off in the installer’s hand during installation. We believe it will be a great hit with our customers,” stated Mr. Garrett. “It has always been our objective to build the finest quality into our products first and foremost. Watch our BuildBlock design team for more new products once these arrive on the scene. We still have many new items to be added to complete our full line.”

Both new products should be on the market by late March of this year. More information about BuildBlock Insulating Concrete Forms can be found at www.buildblock.com.

BuildBlock Building Systems LLC is the manufacturer of BuildBlock® Insulating Concrete Forms (ICFs). Headquartered in Oklahoma City, BuildBlock serves North America through its manufacturing facilities in Colorado, Wisconsin, Massachusetts, Idaho, Indiana, Florida, Alabama, Utah, and Missouri.
