BuildBlock Adds Two New Manufacturing Facilities in U.S.

(Oklahoma City, OK, June 20, 2006) – BuildBlock Building Systems LLC – manufacturer of BuildBlock insulating concrete forms (ICFs) – has announced the establishment of new manufacturing facilities in Decatur, Alabama and Nixa, Missouri. Production has already begun in Decatur and BuildBlock’s full product line will be available through the Nixa facility by mid-summer. There are now a total of nine plants throughout the U.S. which manufacture and serve as factory distribution points for BuildBlock ICF products.

“Our goal is to make our state-of-the-art BuildBlock ICF technology available and economical throughout North America and reducing shipping distances is a big part of that,” said Mike Garrett, President and CEO of BuildBlock. “These three new locations significantly lower the shipping costs in each region and create very valuable business opportunities for those interested in becoming BuildBlock ICF distributors or dealers.”

BuildBlock is partnering with EFP Corporation in Decatur and Diversified Plastics Corp. in Nixa. BuildBlock’s other manufacturing facilities are located in Florida, Wisconsin, Indiana, Massachusetts, and Colorado in addition to two plants operating in Idaho.

Headquartered in Oklahoma City, BuildBlock Building Systems LLC is the manufacturer of BuildBlock® Insulating Concrete Forms.
